ABOUT

AI-Powered Delivery.

- Builds data platforms, blockchain, crypto, CRM and custom software.
- For startups, scale-ups and businesses needing real engineering — no full team required.
- AiSkilled AI engine + senior expertise = dev team quality at a fraction of the cost.

WHY BISKILLED

Not a ticket number.

- Most agencies hand you a junior. At BiSkilled the discovery call team writes your code.
- 18+ years across AI, blockchain, cloud, data engineering and DevOps — genuine depth.
- Boutique roster of select clients — you get a dedicated partner, not a ticket number.

WHY NOW

The window is now.

- AI is already reshaping how businesses operate and acquire customers — not a trend.
- The gap between businesses that have and haven't adopted AI is widening every month.
- Companies that move now gain a head start in efficiency, experience and cost.

Up to 90% cost reduction

vs a traditional team — without sacrificing quality or senior oversight.

Pricing on discovery call

What you get vs the traditional way

The old way

- Developer — £45k–£80k/year
- Project manager — £35k–£55k/year
- 6–12 months before anything ships
- Full salary, NI, benefits, holiday cover
- Managing people with different skills
- Risk: one person leaves, stalls project
- Annual cost: £80k–£135k+

Before a single feature ships

VS

The BiSkilled way

- Senior architect + AiSkilled AI engine
- AI-accelerated, focused delivery
- Working software in 2–4 weeks
- Flat engagement — no hiring overhead
- One team, fully managed end-to-end
- AiSkilled retains full project context
- Up to 90% cost reduction
